

Instructions for the correct use and guarantee conditions

Dear client: first of all thank you for purchasing Lounge-book, an innovative solution for using your lap top in complete liberty and in the perfect ergonomic position. To guarantee minimal waste of space and to optimize the logistics, the product is supplied completely “unassembled”, and is packed in a package that has been purposely studied to avoid any damage during transport. An exclusive Color Kit is also available so that the color of the laptop and the mouse support can easily be changed at any time to accommodate your style and match your interior design.

Advice n° 1: Keep the Lounge-book box: it could come in useful during transportation, when, for example, you go on holiday or away for a weekend.

Follow the attached outlined instructions carefully and within 5 minutes you will be able to use your Lounge-book to its full function.

Particular characteristics and advice for optimal use:

- The main, high connection support with its 3 points on the base are fitted with rubber “tips”, designed to minimise vibration due to the normal use of the keyboard and touch-pad even on uneven surfaces.

Advice n° 2: It is advisable to place the lounge-book on an even surface thus avoiding any differences in height due to broken flooring or carpets.

- The ergonomic structure of Lounge-book allows for a lateral position to give free movement. Thanks to its symmetric system, it can be used either from the right or left side indifferently.
- The height of the main support can be adjusted simply by blocking the telescopic tube with a screw.
- The laptop support’s “No Fear” joint for positioning the inclination and controlled horizontal direction, was designed so that the perfect position can be achieved without endangering the system.

Advice n° 3: We suggest that you relax for a few minutes and try out the various settings in order to find the desired position:

- a) Position Lounge-book to best match your work place and your own inclination for using the right or left hand for the mouse support.
- b) Adapt the height of the main support to give maximum freedom to your movements. It is a good idea to carry out this operation by starting with the maximum height, taking advantage of the natural gravitational force, being very careful to support the laptop with one hand and regulate the blocking knob with the other.
- c) The final horizontal and vertical positioning of the laptop support is essential for a correct inclination of the keyboard and monitor, useful to compensate any possible defects in an incorrect perpendicular position of the structure.

- The support for the laptop “Air Flow” has been designed to give maximum adhesion, mechanical capacity and a correct airflow aeration for electronic cooling.

Advice n° 4: To obtain the best performance of this particular characteristic, it is advisable to place the laptop directly onto the support avoiding blocking any aeration holes with sheets of paper or other things that might cause the support to function incorrectly.

- A micro-table, known as “Lounge-Pad”, is co-ordinated to the support so that an external mouse, if used, is easily movable.

Advice n° 5: The dimensions are compatible with a standard mouse but, in order to obtain maximum performance, we advise using a wireless mouse. If a portable touchpad is to be used, the mouse support can become a good place to put any external peripheral computer devices, mobile phones, remote controls etc...

- We advise cleaning Lounge-book with a soft dry cloth. Ordinary cleaning products for dusting furniture and plastic parts can also be used. Do not use products that contain solvents or acids.

Use limitation:

- a) Lounge-book has been designed for all ordinary laptops on the market from 11” to 17”. It is the user’s responsibility to carry out an initial evaluation in order to verify the stability of the object with his/her personal laptop and its proper use before proceeding to constant use.
- b) Lounge-book was designed to be used on flat and stable surfaces. Other conditions could cause the laptop to fall.
- c) Moving the Lounge-book with the laptop on top could cause it to fall especially if your laptop is heavy or awkward.
- d) It is advisable to connect low voltage devices (lamps etc...) to the main structure of Lounge-book.
- e) It is advisable to use the laptop “Air Flow” system as a lectern or for objects of no more than 4 Kg, 1 Kg for the “Lounge-Pad” support.
- f) It is advisable not to put too much pressure on the objects on the support (laptop, mouse etc...), especially near the edges; Lounge-book has been designed to support the pressure of fingers on the keyboard and touchpad and that of a hand on a mouse on the Lounge-pad.
- g) Exposing the system to excessive sources of heat (chimneys, electric/gas fire etc...) or to an extended period of time in the sun, corrosive agents and atmospheres with a high density of salt and/or humidity in the air, can damage the system or make it more fragile.
- h) Do not use it underwater or in other liquids or in poorly stable conditions.

Guarantee conditions

Dear client: Lounge-tek selects its suppliers by adopting very severe criteria and offers a 2-year guarantee period from the moment of sale in accordance with EU directives that protects the client from any manufacturing defect in the Lounge-book product.

Any defects must be reported by compiling the special on-line form that can be found in the “Support” area on this web site: www.lounge-tek.com

The guarantee will have effect when any requests for after-sale assistance are documented with clear digital photographic proof and with the purchase documentation or the number of the production part indicated on the package label if you bought your product through a reseller. A form for making your assistance request is available on-line and is to be filled in with all obligatory data. It is also possible to upload any image files necessary to document the problem.

Lounge-Tek reserves the right to decide whether or not to substitute the entire product or the defective parts by sending them, free of charge, to the user’s home address. In the case of dubious documentation, Lounge-Tek’s after-sale service reserves the right to request the return of the whole defective part. The user will be entirely liable for this operation and should send the part/product to Lounge-Tek’s technical support workshop, adequately packed and accompanied by the correct documentation reporting the after-sales number that can be found on the request filled in on the on-line system.

Guarantee limitations

Lounge-book is a support designed for laptops, portable computers, tablet pc, books or magazines with some limits as reported in this document (in particular in the section on the “Use limitations”). Any other use will have to be evaluated by the user and will then be his complete responsibility.

The guarantee conditions exclusively refer to Lounge-book production defects. Lounge-tek srl is not responsible for any damages caused to the integrity of equipment and data contained within, even if caused by defects acknowledged by the company. It is the user’s responsibility to constantly verify the correct function of the product in relation to the desired use. Lounge-tek is not responsible for the incorrect use or damage to the user’s equipment with inclinations or conditions of use for which Lounge-book has been designed in its standard mode. In particular, Lounge-tek does not guarantee the function of optical pointers or any screen inclinations that the laptop does not normally allow and complete accessibility to all the connections and openings of every product. It’s the client responsibility to check that the laptop and its peripheral devices are compatible to the Lounge-book method that the client himself has selected.

To help you with a correct use of the product here there are some special recommendation for the instructions with the guarantee, as there are some warning concerning the guarantee the parts subject to wear and tear aren’t covered (Lounge-Pad, rubber “tips”, blocking knob) or with all the faulty parts due to negligence, fault or intention of the user to damage the product, position the support without appropriate security measures, exposing the system to excessive sources of heat, alterations, lightning, floods or any other natural calamity. The components have been thought for a normal use, the guarantee doesn’t cover eventual damages caused by the wrong use of the product: support of too heavy objects or pointed objects, a wrong distribution of the weight, forcing the fastening of screws or knobs. In any case the guarantee doesn’t cover damages due to wrong assembly of parts of the product by the user. Lounge-Tek reserves it self from asking operating expenses issued from any kind of damage caused by an incorrect indication of the user. For any kind of complaint the correct Forum to contact is to contact us at Verona - Italy.

Lounge-Pad, Lunge-Book and Lounge-Tek are brands registered from Lunge-Tek srl, every property right is reserved.
